What exactly is Permanent Makeup?

Permanent cosmetic makeup is the art and science of implanting color into your skin. It is putting the right color in the right place so you can look better naturally. Specialized instruments allow your practitioner to place color into the layer of skin known as the dermis. Because the outermost layer of skin, the epidermis, is always shedding and renewing itself, you are looking at the color through a thin veil of skin. When your procedure is completed, the color will appear darker than the final result. This is because the color is in BOTH the epidermis and the dermis. The color in the top layer will flake off during the healing process.

10 Good Reasons for Permanent Make-up

1. Convenience. You just need more time.
2. Allergies to ordinary makeup. Sensitive skin.
3. Wear glasses or contact lenses or had Lasik surgery
4. Arthritis or painful hands
5. Difficulty applying makeup or you don't like the way it smears and disappears
6. Aging changes in brows, lips, eyes
7. Active, outdoor lifestyles
8. If you like a natural "no makeup" look
9. You've lost hair from alopecia, chemotherapy, accidents, burns or cosmetic surgery.
10. If you want to replace color. Breasts (areola), cleft lips and vitiligo patches are examples where cosmetic tattooing can help.

FLhair™
Xtensions

100% First Choice Remy Hair European Textured

1. What Separates FLhair™ Xtensions from all other methods in the industry?

The uniqueness of FLhair™ Xtensions is fourfold

1. Consistent quality Remy Human Hair
2. Our advanced Micro-cylinder shell design. Small, weightless and strong
3. Each shell's interior is coated with a Silicone compound to protect the hair from compression stress.
4. The outer shell is colored coordinated to match the hair color for truly sightless gentle dependable connections.

2. How are FLhair™ Xtensions applied?

Our extensions are attached strand by strand. The clients hair is passed through our advanced micro-cylinder shell. Once the proper placement is achieved, the shell is compressed to create a connection between the clients hair and the extension hair. No Glue, heat, chemicals, sewing or tracks.

3. How long does it take to apply FLhair™ Xtensions?

With FLhair™ Xtensions the application that will become the foundation of the hair style will vary based on the individual client. On average a full head of extensions can be achieved with 160 strands. Skill levels will delegate the actual time between 2-3 hours.

4. Will hair extensions damage my hair?

Hair extensions for all practical purposes will not damage hair. But that can not be said for the various application and attachment methods. As an example, a strand by strand compression connection method is much more hair friendly than methods that incorporate the use of heat, glue, chemicals, sewing lines and track systems.

5. How long will FLhair™ Xtensions last?

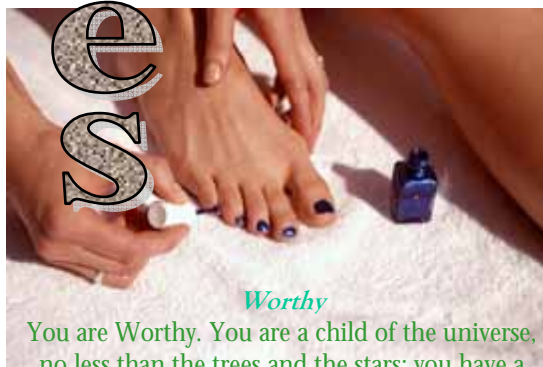

Basic hair and scalp anatomy and physiology will be the determining factors. Unlike other companies, we suggest that extensions be worn for no longer than 3 months or 1 1/2 inches of the clients hair growth, whichever comes first. As with any hair extension method daily shedding, if not removed bi-monthly, may result in severe tangling at the base of the scalp area.

6. Are the extensions easy to remove?

FLhair™ Xtensions removal is quick and easy. Our Advanced Compression Technology is immediately reversible without creating any damage or hair loss, usually associated with other extension methods that use glue, heat, chemicals, sewing lines or tracks.

*The future of nail technology
Is at your finger tips*

Artificial nail technology has been around for decades, from liquid and powder systems to wraps. The style was right but problems with discoloration, lifting and aggressive chemicals with odor and harmful vapors that come as part of the application process represented the price women had to pay for artificial nails.

That is, until "Light Concepts Nails".

Women of all ages and professions have shown sustained and growing interest in the appearance of their hands and nails. Well groomed and stylish nail treatments are increasingly perceived as a clear statement about the personal pride of the individual wearing them and no product makes that statement better than "Light Concept Nails"
